

YOUR GUIDE TO
KANGEN WATER
& THE K8

CHANGE YOUR WATER, CHANGE YOUR LIFE.

Water is the source of all life, making up 60-70% of your body and essential for optimal health. The quality of water you consume directly impacts every cell in your body, playing a crucial role in how you function, feel, and thrive.

The Kangen K8 by Enagic is revolutionising hydration and wellness. Designed with advanced ionisation technology, the K8 transforms regular tap water into antioxidant-rich Kangen Water® that supports better health, hydration, and sustainability.

Your Body is Made of 60-70% Water!

Water is essential to life and your body depends on water for nearly every essential function:

- Regulating body temperature
- Maintaining healthy skin
- Lubricating joints
- Digesting food
- Supporting brain function
- Producing bodily fluids like tears and saliva
- Transporting vital nutrients
- Acting as a shock absorber for the brain, spinal cord, and fetus
- Without adequate hydration, our bodies deteriorate. This makes the quality of the water we drink more critical than ever.

NOT ALL WATER IS CREATED EQUAL

The Modern-Day Problem: Oxidative Stress

Free radicals and antioxidants naturally exist in the body, but when these become imbalanced, oxidative stress occurs, damaging proteins, lipids, and DNA. Over time, this can contribute to aging and the onset of chronic diseases.

While oxidative stress is inevitable, lifestyle choices, including the water you drink, can reduce its effects.

Tap Water: Doing More Harm Than Good?

According to the Environmental Working Group, 315 pollutants have been found in America's tap water since 2004, with many unregulated and potentially harmful. Industrial disinfectants like chlorine can create by-products linked to cancer and birth defects.

Is Bottled Water the Solution?

Bottled water is not only harmful to the environment but also poses health risks. Microplastics, BPA, and additives like magnesium sulfate contaminate bottled water, making it a poor choice for hydration. Both tap and bottled water are often acidic, polluted, and detrimental to both health and the planet.

THE MODERN-DAY SOLUTION: KANGEN WATER

Kangen means "return to origin" in Japanese.

For over 40 years, Kangen Water has been transforming ordinary tap water into antioxidant-rich, alkaline, and restructured water, offering a healthier, more sustainable solution.

Antioxidant

Kangen Water is scientifically known as Electrolyzed Reduced Water (ERW). Scientists worldwide recognise ERW for containing molecular hydrogen, a potent antioxidant that mitigates oxidative stress by neutralising free radicals. Molecular hydrogen diffuses rapidly across cell membranes, reaching critical organelles like mitochondria and nuclei to protect and rejuvenate cells.

Kangen Water also exhibits a negative ORP (Oxidation-Reduction Potential) of up to -850 mV, reflecting its exceptional antioxidant capacity. This negative ORP means Kangen Water can effectively combat oxidative stress and support overall health at a cellular level.

Alkaline

With a pH level of 8.5-9.5, Kangen Water helps balance your body's natural pH and supports overall wellbeing. Optimal health begins with balance, and maintaining a slightly alkaline pH of 7.365 is vital for your body's function. The pH scale determines whether a substance is acidic or alkaline: 7.0 is neutral, anything above 7 is alkaline, and below 7 is acidic.

Kangen Drinking Water with its alkaline pH counteracts the high acidity caused by sodas, alcohol, processed foods, and conventional tap or bottled water. By choosing Kangen Water, you are supporting your body's ability to function at its best.

Restructured

Restructured water means re-organised water molecules. In liquid form, water molecules bond together, forming specific geometrical patterns. Kangen Water's micro-clustered molecules allow for faster absorption and superior hydration. However, this effect is not permanent, so it's best to consume Kangen Water fresh to maximise its benefits.

THE SCIENCE OF KANGEN WATER

What is Kangen Water?

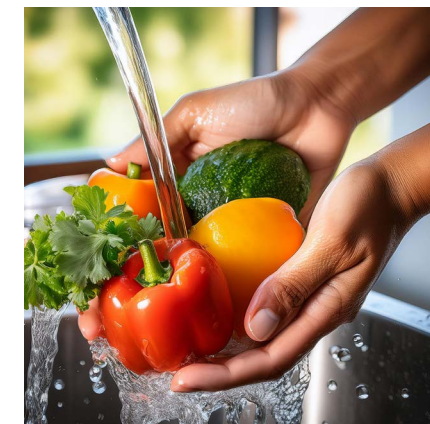

Kangen Water® is ionised alkaline water created through electrolysis. It's rich in antioxidants, has superior hydration properties, and supports the body's natural detox processes.

FIVE TYPES OF WATER

The K8 produces five types of water, each designed for specific uses:

pH 11.5 Strong Kangen Water

Ideal for cleaning and
removing pesticides.

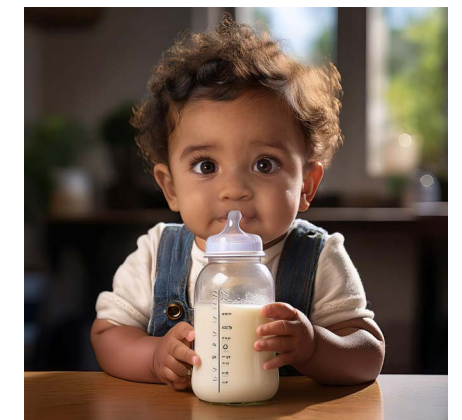

pH 7.0 Neutral Water

Safe for medication
and infant formula.

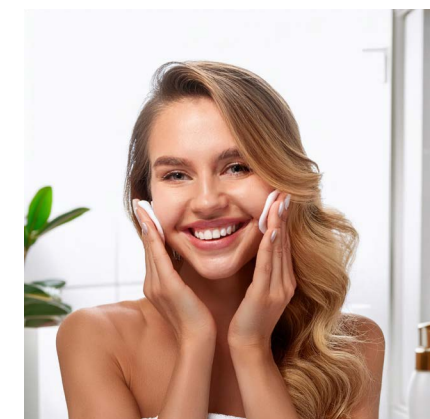

pH 8.5-9.5 Kangen Water

Perfect for drinking
and cooking.

pH6.0 Beauty Water

A gentle toner for
skin and hair care.

pH2.5 Strong Acidic Water

A powerful
disinfectant for
surfaces and wounds.

THE K8: A REVOLUTION IN HYDRATION

Why Choose the K8?

Unmatched Antioxidant Potential

The K8 creates water infused with molecular hydrogen, a potent antioxidant that combats oxidative stress and supports overall health. With a negative ORP of up to -722 mV, this water helps neutralise harmful free radicals and keeps your body in balance.

Five Types of Water for All Your Needs

From 11.5 pH Strong Alkaline Water for deep cleaning to 2.5 pH Strong Acidic Water for sanitisation, the K8 provides versatility unmatched by other systems. Whether it's drinking water for optimal hydration, Beauty Water for skincare, or Neutral Water for safe medication use, the K8 ensures you have the right water at your fingertips.

Main Uses of Kangen Water

The K8 machine produces five types of water, each with unique applications:

MILD ACIDIC & BEAUTY WATER pH 4-6

Function: Astringent for beauty purposes

Uses:

- Skin toner
- Watering plants
- Hair spray
- Cleaning windows, tiles, & ceramics

NEUTRAL WATER pH 7

Function: Clean, non-ionised water

Uses:

- Baby formula
- Drinking with meals
- Safe for medication

STRONG ACIDIC WATER pH 2.5

Function: Sterilisation & disinfection

Uses:

- Pesticide removal from food
- Disinfecting wounds, skin, & surfaces
- Mouthwash

STRONG ALKALINE WATER pH 11.5

Function: Cleaning, rinsing, & pesticide removal

Uses:

- Soaking produce to remove pesticides
- Laundry
- Cleaning greasy surfaces

KANGEN WATER pH 8.5-9.5

Function: Ionised drinking water for humans & pets

Uses:

- Daily hydration
- Cooking
- Making ice

KANGEN WATER
HELPS NEUTRALISE
HARMFUL FREE
RADICALS AND
KEEPS YOUR BODY
IN BALANCE.

EFFORTLESS OPERATION AND ADVANCED TECHNOLOGY

User-Friendly Design

The K8 features a full-colour LCD panel and voice-guided prompts for intuitive operation, ensuring you always get the right water type with ease.

Smart Filter Technology

The K8’s filtration system removes 95% of chlorine, sediments, and odours while retaining essential minerals. Its smart filter alerts you when it’s time for replacement, guaranteeing the best water quality.

Superior Ionisation

With eight platinum-coated titanium plates, the K8 delivers high levels of ionisation for consistently superior water quality.

SUPERIOR IONISATION TECHNOLOGY

Eight Platinum-Coated Titanium Plates

The K8’s advanced design incorporates eight platinum-coated titanium plates, delivering a higher level of ionisation. This ensures you consistently receive water with the optimal pH and antioxidant properties, even at higher flow rates.

Smart Filter Technology

Equipped with a sophisticated filtration system, the K8 removes 95% of chlorine, sediments, and odours while retaining beneficial minerals. It even alerts you when it’s time to replace the filter, ensuring water quality is never compromised.

Key Specifications

Features	Specification
Electrode Plates	8
Plate Size (mm)	135 x 75
Negative ORP (mV)	Up to -722
pH Range	2.5 - 11.5
Water Types Generated	5
Wattage (W)	230
Weight (kg)	5
Dimensions (mm)	279 x 345 x 147
Production Rate (L/min)	Kangen: 4.5 - 7.6
Warranty (years)	5

Built for a Global Community

The K8 supports eight languages, making it the perfect choice for diverse households and businesses. Whether your audience is local or international, the K8 is ready to deliver.

The Eco-Friendly Choice

Our reliance on single-use plastics and chemical cleaners has devastating effects on the environment.

The natural solution is returning to the liquid that is the source of all life on Earth:
WATER

The Kangen Water machine offers a sustainable alternative by replacing harmful cleaning products and reducing plastic waste.

Reduce Plastic Waste

By switching to Kangen Water, you can eliminate the need for bottled water and plastic-packaged cleaning products. This small change can have a massive impact on reducing plastic waste in landfills and oceans.

Eliminate Toxic Chemicals

Kangen Water replaces harmful household cleaners with five versatile water types. These waters can disinfect, remove residue, and tackle grease, all without introducing toxins into your home or environment.

Promote a Healthier Planet

The multifunctional uses of Kangen Water ensure you can clean, sanitise, and hydrate using a single, natural resource: water. This return to simplicity is a step toward a greener, more sustainable future.

UNIQUE CHARACTERISTICS OF KANGEN WATER FOR CLEANING:

pH 2.5: STRONG ACIDIC WATER

Disinfects: Effectively kills bacteria and viruses.

Breaks Down Proteins: Useful for sanitising food prep areas.

Deodorises: Removes unpleasant smells naturally.

Brightens: Keeps surfaces looking fresh and clean.

pH 4-6: MILD ACIDIC & BEAUTY WATER

Strips Soapy Residue: Leaves surfaces clean and residue-free.

Shines Surfaces: Perfect for mirrors, tiles, and ceramics.

Creates a Sheeting Action: Enhances cleaning efficiency.

PH 11.5: STRONG ALKALINE WATER

Emulsifies Fats and Oils: Dissolves grease effectively.

Lifts Dirt: Makes cleaning stubborn grime easier.

Repels Dirt: Maintains cleanliness longer.

Restores Bright Finishes: Keeps items looking like new.

Cleans Without Residue: Works like soap, minus the toxins.

WHEN YOU PURCHASE YOUR KANGEN WATER MACHINE

Your distributor will provide the Kangen Lifestyle E-book, an invaluable resource detailing all the uses of the various pH levels. This guide includes recipes and instructions for creating a clean, green, and safe home environment using only Kangen Water.

By choosing Kangen Water, you're not just improving your hydration and health; you're taking a stand for sustainability. Together, we can reduce reliance on single-use plastics and chemical cleaners, ensuring a cleaner, healthier planet for future generations.

**CHANGE YOUR WATER, CHANGE
YOUR LIFE — AND THE WORLD.**

Unleash the Potential

With the K8, you're not just investing in your health, you're leading a movement toward better hydration, improved wellness, and environmental sustainability. Whether you're using it in your home, sharing it with clients, or educating your community, the K8 is the ultimate tool for transforming lives.

For more information about how the K8 can enhance your lifestyle, contact your Enagic representative today. Experience the power of Kangen Water® and join the mission to change your water and change your life!

About Enagic International

For over four decades, Enagic International has led the way in water ionisation technology.

With ISO 9001, ISO 14001, and ISO 13485 certifications for quality control and environmental management and the prestigious Water Quality Association Gold Seal, Enagic ensures each machine is individually crafted and rigorously tested to deliver unparalleled quality and performance.

Join the global movement to prioritise health, hydration, and sustainability with Kangen Water and the K8.
